

## EDUCATION PROGRAM PACKAGE

A Place for Parrots - 60 minutes \$150 (\$75 for each additional program the same day)

Two educators and an ambassador parrot will visit your students/scouts/group. Through inquiry-based learning, students will explore parrot anatomy, habitats, and threats. We will discuss how Intertwined Conservation makes a difference, and how students can help, as well. If conditions allow, our ambassador parrot will demonstrate several free-flights right over your students' heads!

This program also includes an activity supplied and run by our educators. Options include:

1. Make red-crowned Amazon paper plate masks
2. Bird Beak Adaptation Game
3. Have students write letters/make videos to share with Costa Rican students

To book your educational parrot encounter today please send all inquiries to:
